Teamleader radiation physics

Radiotherapy

Department

The radiotherapy department takes care of radiation treatments of oncology patients. The clinical exam of the patients, the radiation planning, the localization as well as the radiation itself are performed within the department.

The department disposes of 2 new , fully equipped linear accelerators and treats about 1300 patients a year.

Function

- Together with the main responsible, you take care of the efficient organization of the physicists within the radiotherapy department
- You manage the staff by motivating them, you monitor their performance and you adjust where necessary
- You evaluate and optimize the working methods in view of improving the efficiency and quality of the healthcare processes
- You handle the HR cycle of your team in line with the mission, vision and strategic goals of AZ Sint-Maarten
- In addition to your duties as team leader you also participate in the day to day operation of the department
- You work closely together with all members of the multidisciplinary radiotherapy team

Profile

- You are master of engineering sciences, industrial sciences, physics, chemistry or an in Belgium equally recognized degree conform the Royal Decree of 23/10/1997 art 51.3.3.
- You are a medical physics expert (MPE) in radiotherapy.
- Additional leadership training or previous management experience is a plus
- You can give direction to a group and stimulate mutual cooperation
- You have at least 5 yrs experience as radiation physicist
- You preferably already have experience with the implementation and follow-up of operational objectives as well as the implementation of innovative radiation techniques
- You are strong in planning and organizing and can adjust priorities wherever necessary
- You can work under pressure and still set the right priorities
- You endorse our OSKAR-core values – openness, collaboration, quality, ambition and respect – the essential elements of the DNA of our hospital, allowing us to make a difference especially in benefit of the well-being of our patients.

Contractual terms and conditions

- Full-time contract for an indefinite period
- Start date to be discussed
- An internal training plan is provided
- More information about our assets can be found [here](#)
